

Deno PDF Generator - Feature Showcase

This document demonstrates all the major features of the Deno PDF Generator module. It includes examples of page setup, text formatting, complex tables, and footers.

Feature Table

Feature	Description	Example
Page Setup	Set page size and orientation. This document is A4 Portrait.	pageSize: "A4", pageOrientation: "portrait"
Text Wrapping & Alignment	Long lines of text automatically wrap to fit their container. You can align text left, right, or center.	This text is centered.
Complex Tables	Tables support dynamic widths, styling, and advanced cell content.	widths: [100, "*", 150]
Cell Alignment	This cell demonstrates vertical and horizontal alignment within a table.	Bottom-Right
Multi-Page & Footers	Content automatically flows to new pages. A footer can be replicated on each page with page numbers.	Page {pageNumber} of {totalPages}
Cell with a number	123	

New Features on This Page

This text is in Times New Roman, italics.

Unordered List:

- Item 1
- Item 2
- A long list item that will definitely need to wrap to the next line to show how well the text wrapping works within list items.

Ordered List:

1. First item
2. Second item
3. Third item

Full-Width Table

This column will be one-third of the page width	This column will also be one-third	And so will this one
<i>This is a test</i>	Nothing special here	And nothing here either

Auto-width Table

Header 1	Header 2	Header 3	Header 4
Short	This column will expand to fill the remaining space.	Fixed 100	This is a cell with a bit more text.
A much longer text content	Another cell	100	Short
Medium	And a third one	100	A cell
